DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The statement of reasons for allowance of claims 1-18 are set forth the same as stated in the notice of allowability in the parent application, which is repeated as followings:

The prior art of record fails to clearly teach or fairly suggest a method for billing a subscriber for a local toll-call communication the steps of, inter alia, transmitting the terminating number information to the local intelligent network element (i.e., terminating service switching point "SSP") and having the local intelligent network element compare the geographical location of the originating number information to the geographical location of the terminating number information, as substantially described and connected to the amended independent claims 1 and 11.

Furthermore, the prior art of record also fails to clearly teach or fairly suggest a method for discriminating among toll-free calls to identify those communications that are originated and terminated within the area in order to bill the communication at a selected rate, the method comprising the steps of, inter alia, analyzing the origination point and the destination point to determine whether the communication may be entirely routed via one or more local telecommunication network elements associated with a local telecommunications service provider, as substantially described and connected to the amended claims 16.
